 UNIVERSAL IMPACT FACTOR: <http://www.uifactor.org/Certificate.aspx?jid=1771&Year=2013> Current Status: *Master*; Impact Factor for year 2013 is = 1.518 "*The Universal Impact Factor is a measure of the frequency with which the "average article" in a journal has been cited in a given period of time. The impact factor is used as standard dimension and the relative importance of a scientific journal within its field. The Universal Impact Factor is calculated by several scientific methods. No Evaluation Processing Fees. The Universal Impact Factor {UIF}, a number calculated annually for each scientific journal based on the average number of times its articles have been referenced in other articles, is not intended to be used to evaluate individual scientists, but rather as a measure of journal quality. The impact factor is used to compare different journals within a certain field. The impact factor is highly discipline-dependent, due to the speed with which papers get cited in a field.*"
